THE

LONDON, EDINBURGH, AND DUBLIN

PHILOSOPHICAL MAGAZINE

AND

JOURNAL OF SCIENCE.

CONDUCTED BY

SIR OLIVER JOSEPH LODGE, D.Sc., LL.D., F.R.S.
SIR JOSEPH JOHN THOMSON, O.M., M.A., Sc.D., LL.D., F.R.S.
JOHN JOLY, M.A., D.Sc., F.R.S., F.G.S.
RICHARD TAUNTON FRANCIS

AND

WILLIAM FRANCIS, F.L.S.

"Nec aranearum sane textus ideo melior quia ex se fila gignunt, nec noster vilior quia ex alienis libamus ut apes." JUST. LIPS. *Polit.* lib. i. cap. 1. Not.

VOL. XLVI.—SIXTH SERIES.

JULY—DECEMBER 1923.

LONDON:

TAYLOR AND FRANCIS, RED LION COURT, FLEET STREET.

SOLD BY SMITH AND SON, GLASGOW;—HODGES, FIGGIS, AND CO., DUBLIN;—
AND VEUVE J. BOYVEAU, PARIS.

"Meditationis est perscrutari occulta; contemplationis est admirari perspicua .... Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem."—*Hugo de S. Victore.*

——"Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus ferrugine condat,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu."

J. B. Pinelli ad Mazonium.

CONTENTS OF VOL. XLVI.

(SIXTH SERIES).

NUMBER CCLXXI.—JULY 1923.

Page

Dr. D. Wrinch and Dr. H. Jeffreys on the Theory of Mensuration.. 1

Prof. F. H. Newman on the Absorption produced by Electrically Luminescent Sodium Vapour. (Plate I.) 22

Mr. B. E. Mourashkinsky on the Diffraction Pattern in a case of two very close Point-Light Sources. (Plate II.) 29

Dr. H. Hartridge on Physiological Limits to the Accuracy of Visual Observation and Measurement 49

Mr. Satyendra Ray on Images obtained by means of a Semi-infinite Obstacle. (Plate III.) 79

Mr. J. J. Dowling on the Recording Ultramicrometer; its Principles and Application : 81

Prof. S. Chapman on the Fluctuation of Water-Level in a Tidal-Power Reservoir..... 101

Dr. T. J. I'a. Bromwich on the Magnetic Field produced by Circular Currents 108

Mr. H. Monteagle Barlow on the Repulsion Effect between the Poles of an Electric Arc 112

Dr. H. Jeffreys on the Effect of a Steady Wind on the Sea-level near a Straight Shore..... 114

Prof. S. R. Milner on the Stress System of the Four-Dimensional Electromagnetic Field 125

Dr. F. Horton and Dr. A. C. Davies on the Emission of Secondary Electrons from Metals under Electronic Bombardment 129

Dr. F. C. Hoyt on the Relative Intensity of X-Ray Lines 135

Prof. A. McAulay on Poisson's and Green's Theorems in Riemann's n-manifold both when it is space-like and when time-space-like.. 146

Prof. A. McAulay on the Mechanical Forces indicated by Relativity in an Electromagnetic Field. Can their existence be demonstrated? 156

Mr. T. Lonsdale on the Flow of Water in the Annular Space between two Coaxal Cylindrical Pipes 163

Prof. J. Joly on Movements of the Earth's Surface Crust. II. 170

Dr. A. M. Mosharrafa on the Quantum Theory of the Complex Zeeman Effect 177

Prof. L. Vegard on the Auroral Spectrum and the Upper Strata of the Atmosphere. Preliminary Communication 193

Dr. F. W. Aston on the Theory of the Abnormal Cathode Fall.... 211

Dr. V. A. Bailey on the Motion of Electrons in Gases 213

Notices respecting New Books:—

Sir J. C. Bose's Physiology of the Ascent of Sap 218

Page

Proceedings of the Geological Society:—
Mr. W. A. Richardson on a Micrometric Study of the St. Austell Granite (Cornwall) 219
Mr. W. G. St. John Shannon on the Petrography and Correlation of the Igneous Rocks of the Torquay Promontory 220
Prof. W. J. Sollas on Man and the Ice-Age 220
Mr. G. V. Douglas on the Geological Results of the Shackelton-Rowett ('Quest') Expedition 221
Prof. A. C. Seward on the Earlier Records of Plant-Life 223
Mr. S. H. Warren on the Late Glacial Stage of the Lea Valley 224

NUMBER CCLXXII.—AUGUST.

Prof. J. J. Nolan and Rev. H. V. Gill on the Electrification produced by the Pulverization of Aqueous Solutions 225
Mr. R. Ablett: An Investigation of the Angle of Contact between Paraffin Wax and Water 244
Mr. A. F. Core on the Second Virial Coefficient of Gases 256
Dr. D. M. Wrinch on the Lateral Vibrations of Rods of Variable Cross-section 273
Mr. J. F. T. Young on the Crystal Structure of various Heusler Alloys by the Use of X-Rays. (Plate IV.) 291
Dr. H. P. Waran on Disintegration in Discharge Tubes. (Plate V.) 305
Mr. J. Rice on the Velocity Constant of a Unimolecular Reaction.. 312
Mr. A McKeown on the Velocity of Unimolecular Reaction..... 321
Prof. W. C. M. Lewis on the Velocity of a Unimolecular Chemical Reaction 327
Prof. J. R. Partington on the Chemical Constants of Diatomic Gases. 329
Prof. A. M. Tyndall on the Mechanism of the Electric Arc..... 330
Messrs. R. Fraser and J. E. Humphries on the Octet Theory of Induced Alternate Polarities: the Domains occupied by Octet-stable and Octet-unstable Centres..... 331
Mr. Marshall Holmes on a New Phenomenon 335

NUMBER CCLXXIII.—SEPTEMBER.

Dr. N. W. McLachlan on the Energy in the Magnetic Circuit of a Magneto 337
Sir G. Greenhill on Orbits in the Field of a Doublet, and generally of Two Centres of Force 364
Mr. E. Jones on Energy Relations in the High-Tension Magneto .. 386
Prof. E. H. Barton and Dr. H. M. Browning on Linear, Exponential, and Combined Dampings exhibited by Pendulum Vibrations. (Plates VI. & VII.) 399
Dr. H. H. Poole on Sub-Continental Temperatures..... 406
Mr. K. Basu on Grouping of the Lines of the Secondary Spectrum of Hydrogen 417
Prof. F. H. Newman on the Absorption of Light by Sodium Vapour. (Plate VIII.) 420
Prof. C. V. Raman and Mr. K. S. Rao on the Polarization of the Light scattered by Gases and Vapours..... 426

Page
Mr. E. T. Hanson on the Reaction of the Air to a Circular Disk Vibrating about a Diameter 434
Prof. W. M. Thornton on the Curves of the Periodic Law.—II. .. 442
Prof. T. R. Merton and Mr. R. C. Johnson on the Illumination of the Spectroscope with End-on Vacuum Tubes. (Plate IX.) 448
Miss A. Everett on Unit Magnification Surfaces of a Glass Ball.... 450
Mr. D. R. Hartree on the Propagation of certain Types of Electro-Magnetic Waves..... 454
Dr. R. N. Chaudhuri on the Motion of Electrons in Gases under Crossed Electric and Magnetic Fields..... 461
Dr. L. Simons on Low-velocity X-ray Electrons..... 473
Mr. R. F. Gwyther on Two Solutions of the Stress Equations, under Tractions only, expressed in general Orthogonal Coordinates, with two deductions therefrom..... 481
Mr. R. B. Wilsey on the Crystalline Structures of Silver Iodide... 487
Sir J. J. Thomson: Studies in the Electron Theory of Chemistry. On the changes in chemical properties produced by the substitution of one element or radicle by another, with applications to benzene substitutions 497
Dr. A. M. Mosharrafa on a Second Approximation to the Quantum Theory of the Simple Zeeman Effect 514
Mr. W. H. McCurdy on Electrical Discharges in Geissler Tubes with Hot Cathodes..... 524
Prof. Megh Nad Saha on the Physical Properties of Elements at High Temperatures..... 534
Mr. K. R. Ramanathan on the Colour of the Sea 543
Dr. R. N. Chaudhuri on the Motion of Electrons in Hydrogen under the action of Crossed Electric and Magnetic Fields 553
Miss A. Everett on Unit Curves of a Photographic Lens 565
Notices respecting New Books:—
Sir N. Shaw's The Air and its Ways. The Rede Lecture (1921) in the University of Cambridge, with other contributions to Meteorology for Schools and Colleges..... 568
Prof. W. M. Hicks's The Analysis of Spectra 568
Prof. C. G. Knott's Collected Scientific Papers of John Aitken. 570
Prof. N. Bohr's The Theory of Spectra and Atomic Constitution. 571
Father R. J. Boscovich's A Theory of Natural Philosophy 571
Proceedings of the Geological Society:—
Mr. E. M. Anderson on the Geology of the Schists of the Schichallion District of Perthshire 573
Mr. H. H. Read on the Petrology of the Arnage District in Aberdeenshire: A Study of Assimilation 574
Dr. E. Greenly: Further Researches on the Succession and Metamorphism in the Mona Complex 575
Intelligence and Miscellaneous Articles:—
The Research Staff of the General Electric Co. Ltd. on the Theory of the Abnormal Cathode Fall..... 576

NUMBER CCLXXIV.—OCTOBER.

Prof. L. Vegard on the Constitution of the Upper Strata of the Atmosphere. (Plate X.) 577
Prof. R. Whiddington on a Simple Method of extending the Balmer Series of Hydrogen in a Vacuum Tube 605

Page

Prof. R. Whiddington and Mr. A. Hare on the Ultramicrometer used as a Differential Micromanometer 607
Prof. T. M. Jasper on the Value of the Energy Relation in the Testing of Ferrous Metals at Varying Ranges of Stress and at Intermediate and High Temperatures 609
Mr. S. Barratt on the Influence of Foreign Gases on the Secondary Spectrum of Hydrogen 627
Messrs. M. F. Skinker and J. V. White on the Motion of Electrons in Carbon Monoxide, Nitrous Oxide, and Nitric Oxide..... 630
Mr. W. Barlow on Types of Crystal Symmetry in which no finite symmetrical crystal unit having the complete symmetry of the crystal is to be found 638
Instructor-Commander T. Y. Baker on Dr. Hartridge's Paper on Visual Acuity..... 640
Dr. A. S. Russell on Radio-active Disintegration Series and the Relation of Actinium to Uranium 642
Prof. J. S. Townsend and Dr. V. A. Bailey on the Motion of Electrons in Helium 657
Mr. P. Cormack on the Automobile Steering Linkage..... 665
Mr. G. I. Taylor on the Decay of Vortices in a Viscous Fluid..... 671
Mr. J. H. Mennie on the Period of Protactinium 675
Dr. W. A. Leyshon on Forced Oscillations in Self-maintained Oscillating Circuits..... 686
Dr. R. A. Houstoun and Mr. E. W. M. Heddle on a Statistical Investigation of the Visibility of Red Light 699
Mr. M. A. Giblett on the Effect of the Rolling of a Ship on the Readings of a Marine Mercury Barometer 707
Notices respecting New Books :—
Prof. Karl Pearson's Tables of the Incomplete Γ Function 717
Dr. G. H. Bryan's Mathematical Tables 717
Proceedings of the Geological Society :—
Mr. J. F. N. Green on the Structure of the Bowmore-Portaskaig District of Islay 718
Intelligence and Miscellaneous Articles :—
Prof. R. Whiddington on Ionic Oscillations in the Striated Glow Discharge 720

NUMBER CCLXXV.—NOVEMBER.

Dr. F. Horton, Miss U. Andrewes, and Dr. A. C. Davies on the Excitation of Characteristic X-rays from certain Metals 721
Prof. R. W. Wood on the Vacuum Grating Spectrograph and the Zinc Spectrum. (Plate XI.) 741
Dr. A. M. Mosharrafa on the Stark Effect for Strong Fields 751
Mr. Hirata Nisi and Prof. A. W. Porter on Eddies in Air. (Plate XII.) 754
Mr. H. H. Potter on the Distribution of Velocities among the Electrons emitted by Hot Platinum in an Atmosphere of Hydrogen.. 768
Dr. J. S. G. Thomas and Mr. E. V. Evans on the Entrainment of Air by a Jet of Gas issuing from a Small Orifice in a Thin Plate. 785
Mr. B. E. Mourashkinsky on the Diffraction Image of Two Close Luminous Planes 802

Page
Mr. F. Simeon on the Striking Potential necessary to produce a Persistent Arc in Vacuum 816
Mr. S. Lister on the Two-Dimensional Motion of a Lamina in a Resisting Medium under the Action of a Propeller Thrust 819
Mr. C. A. Mackay on Ionizing Potentials of Helium and some Multiatomic Gases 828
Dr. H. A. Kramers on the Theory of X-Ray Absorption and of the Continuous X-Ray Spectrum 836
Prof. F. Horton and Dr. A. C. Davies on Critical Electron Energies in Hydrogen 872
Prof. A. H. Compton on the Absorption Measurements of the Change of Wave-Length accompanying the Scattering of X-Rays 897
Prof. O. W. Richardson on the Generalized Quantum Conditions.. 911
Mr. W. F. Widdowson and Dr. A. S. Russell on the Relative Activities of Radioactive Substances in an Unchanged Primary Uranium Mineral 915
Mr. W. Barlow on the Partitioning of Space into Enantiomorphous Polyhedra 930
Mr. D. Coster on the X-Ray Spectra of Hafnium and Thulium. (Plate XIII.) 956
Dr. P. S. Epstein on the Stark Effect for Strong Magnetic Fields.. 964
Prof. T. M. Lowry on the Electronic Theory of Valency.—Part II. Intramolecular Ionization in Organic Compounds 964
Prof. H. Bateman on the Theory of Light-Quanta 977
Mr. F. I. G. Rawlins: Some further Observations on the Relation between the Focal Length of Microscope Objectives and the Number of Fringes seen in Convergent Polarized Light..... 992
Mr. E. W. B. Gill on the Emission of Secondary Electrons from Metals under Electronic Bombardment 994
Dr. D. A. Keys on the Adiabatic and Isothermal Piezo-Electric Constants of Tourmaline 999
Dr. N. Campbell on Space 1002
Dr. M. T. Lowry on the Electronic Theory of Valency.—Part III. The Transmission of Chemical Affinity by Single Bonds 1013
Notices respecting New Books:—
Dr. N. R. Campbell's (1) Physics, The Elements; (2) Modern Electrical Theory 1021–1025
Proceedings of the Geological Society:—
Prof. J. Joly on the Bearing of some Recent Advances in Physical Science on Geology 1025

NUMBER CCLXXVI.—DECEMBER.

Mr. E. T. Hanson on the Initial Motion of a Projectile 1027
Mr. N. C. Krishnaiyar on an Experimental Determination of the Inertia of a Sphere Vibrating in a Liquid..... 1049
Mr. A. Bramley on Electronic Conduction in Metals 1053
Prof. F. Y. Edgeworth on the Use of Medians for reducing Observations relating to several Quantities..... 1074
Dr. L. B. Loeb on the Motions of Electrons in Gases and the Formation of Negative Ions in Air 1088
Dr. V. A. Bailey on the Motion of Electrons in Gases..... 1090

Page

Mr. D. R. Hartree on Atomic Structure and the Reflexion of X-Rays by Crystals 1091

Prof. A. S. Eddington on the Spontaneous Loss of Energy of a Spinning Rod according to the Relativity Theory 1112

Messrs. G. Holst and E. Oosterhuis on the Sparking-potential of Gases 1117

Notices respecting New Books :—

Dr. E. N. da C. Andrade's The Structure of the Atom 1122

Index 1123

PLATES.

I. Illustrative of Prof. F. H. Newman's Paper on the Absorption produced by Electrically Luminescent Sodium Vapour.

II. Illustrative of Mr. B. E. Mourashkinsky's Paper on Diffraction Pattern in a case of two very close Point-Light Sources.

III. Illustrative of Mr. Satyendra Ray's Paper on Images obtained by means of a Semi-infinite Obstacle.

IV. Illustrative of Mr. J. F. T. Young's Paper on the Crystal Structure of various Heusler Alloys by the Use of X-Rays.

V. Illustrative of Dr. H. P. Waran's Paper on Disintegration in Discharge Tubes.

VI. & VII. Illustrative of Prof. E. H. Barton and Dr. H. M. Browning's Paper on the Linear, Exponential, and Combined Dampings exhibited by Pendulum Vibrations.

VIII. Illustrative of Prof. F. H. Newman's Paper on the Absorption of Light by Sodium Vapour.

IX. Illustrative of Prof. T. R. Merton and Mr. R. C. Johnson's Paper on the Illumination of the Spectroscope with End-on Vacuum Tubes.

X. Illustrative of Prof. L. Vegard's Paper on the Constitution of the Upper Strata of the Atmosphere.

XI. Illustrative of Prof. R. W. Wood's Paper on the Vacuum Grating Spectrograph and the Zinc Spectrum.

XII. Illustrative of Mr. Hirata Nisi and Prof. A. W. Porter's Paper on Eddies in Air.

XIII. Illustrative of Mr. D. Coster's Paper on the X-Ray Spectra of Hafnium and Thulium.
